your company's  
security worth?**

## Managed Security Services Program

This is the most economical and secure comprehensive firewall security solution available for small offices and medium sized businesses concerned about Internet security. Our combined services and firewall security provide a cost effective solution for any business. Firewalls are a necessity for companies to secure their network from malicious threats on the Internet. Btech's Managed Security Services Program will protect your business from Internet threats such as viruses, intrusion attempts, and Internet pop-ups. Here is a quick look at what is included:

- ▣ All required hardware and software
- ▣ Intrusion prevention
- ▣ Gateway antivirus
- ▣ Quarterly vulnerability assessment
- ▣ Technical support
- ▣ Unlimited changes
- ▣ Block pop-ups and spyware
- ▣ VPN connectivity\*
- ▣ Comprehensive content filtering
- ▣ Automatic updates of the Security System
- ▣ On-site installation
- ▣ Detailed reports

## Features and Benefits

### Comprehensive Content Filtering

Setup users and or groups and prevent them from gaining access to restricted websites. This service will prevent users from accessing inappropriate or non-business related websites. Content filtering is based on over 50+ categories covering 12+ million websites and is frequently updated.

### Easy to Understand Detailed Activity Reports

You will receive reports on a monthly basis detailing such items as bandwidth usage, employee Internet usage, attempted intrusion attempts, and viruses blocked.

### Complete VPN Solution Included\*

Btech's Managed Security Services Program includes VPN capability on its hardware. For a low service fee, secure access to your network from home is available.

### Pop-ups and Spyware

Nothing is more annoying than pop-ups and spyware. Besides their destructive behavior, pop-ups and spyware can make Internet access nearly impossible. Our Security System significantly reduces pop-ups and spyware allowing you to surf the Internet freely again.

### Cost Savings

Thousands of dollars worth of state-of-the-art security equipment is yours for one low monthly fee.

### Customized Firewall Solution for your Network

Included is an ICSA certified firewall. Firewall features include stateful packet inspection and IPSec VPN capabilities. As part of the package the firewall is uniquely customized to work with your network.

### Continuous Updates and Maintenance

All installed security equipment is monitored for proper operation and automatically updated to protect against the latest threats.

### Peace of Mind

Certified security experts will be supporting and monitoring your security equipment 24 hours a day, 7 days a week, 365 days a year.

### Convenience

All required support is handled by Btech's security engineers eliminating the need for you to manage your Internet security.

### Service Scalability and Flexibility

As your network needs grow so does our service. We can accommodate any type of network or growth that your company requires.

### Rapid Deployment

Within a few short days of placing your order, our Managed Security Services Program will secure your computer network environment.

### Installation Included

All equipment is pre-configured, delivered, and installed by our team of security engineers.
